

Existing boundary will be maintained to provide green corridor and connectivity between existing water bodies

We will maintain and enhance the existing boundary vegetation which includes hedgerows and mature trees

Wildflower meadow and/or polytunnels for community food production beneath overhead electricity lines and above buried gas pipe

New hedgerow with trees to be planted

Bird and bat boxes placed on suitable mature trees

Earth bund formed using site excavated material and planted with wildflower grass mix

Substantial belt of woodland planting along the eastern boundary of the site.

Newly constructed access junction
