

## Proposed point of connection and battery storage layout

1

Bird and bat boxes to be installed to existing mature trees.

2

Reptile hibernacula and log piles to be located over the site in field margins.

3

Wildflower grassland to the west of the compound particularly underneath the pylons.

4

Existing hedge to be maintained at taller height circa.3 m and enhanced with native hedgerow trees.

5

New area of tree belt/ woodland to the east to provide screening and improved ecological connectivity between existing vegetation blocks.
